EXPERIENCE

Cola Next / Mezan Beverages

Jul. 2025 – Jun. 2026

PHP / Laravel Developer

Lahore, Pakistan

- Developed and maintained ERP modules using PHP, Laravel, Oracle SQL, JavaScript, AJAX, and jQuery.
- Worked on Finance, Procurement, Sales, Warehouse, Inventory, Distribution, Attendance, and Waste Management workflows.
- Developed CRUD features, reports, business logic, REST APIs, and database structures for internal applications.
- Optimized SQL queries, resolved production issues, and assisted with testing, deployment, and application maintenance.

Logix 199

Jan. 2025 – Jul. 2025

Junior PHP Developer

Pakistan

- Developed ERP and POS applications using Core PHP, Laravel, MySQL, JavaScript, AJAX, jQuery, and Bootstrap.
- Built modules for inventory, accounting, purchasing, sales, customers, distributors, billing, and reporting.
- Developed REST APIs, optimized MySQL queries, and implemented reusable CRUD and business logic.
- Handled debugging, deployments, Git, Composer, cPanel, VPS environments, and production support.

CAT Marketing Systems

Jul. 2024 – Dec. 2024

PHP Developer Intern

Pakistan

- Developed Warehouse Management System features using Core PHP, MySQL, JavaScript, AJAX, jQuery, and Bootstrap.
- Implemented authentication, CRUD operations, barcode inventory, stock tracking, and reporting features.
- Designed database tables, optimized queries, fixed bugs, and assisted with deployment and maintenance.

PROJECTS

Enterprise ERP Modules

PHP / Laravel / Oracle SQL

- Developed ERP modules covering Finance, Procurement, Sales, Inventory, Warehouse, Distribution, Attendance, and Waste Management.
- Implemented business logic, CRUD operations, reporting, REST APIs, authentication, and database optimization.

POS Backend System

PHP / Laravel / MySQL

- Developed backend modules for products, inventory, sales, purchasing, customers, billing, distributors, and reporting.
- Implemented transaction workflows, REST APIs, CRUD operations, AJAX integration, and optimized SQL queries.

CoachTribe SaaS Platform

Laravel / PHP / Stripe

- Developed backend features and RESTful APIs for a SaaS coaching platform using Laravel, PHP, and MySQL.
- Integrated Stripe for subscription and payment processing, with Laravel queues and scheduled jobs for automated tasks.
- Implemented authentication, third-party API integrations, and background email notifications.

YourSolarPermit.com

Laravel / PHP / QuickBooks

- Developed backend functionality for a solar permitting platform using PHP and Laravel.
- Integrated QuickBooks for accounting workflows and online payment processing.
- Implemented API communication, business logic, database features, and application maintenance.

Warehouse Management System

Core PHP / MySQL / AJAX

- Built inventory management features including products, stock intake, barcode tracking, reporting, and administration.
- Implemented database relationships, CRUD operations, AJAX workflows, and SQL query optimization.
